

# IS300 Data Upload - Directory Structure

Mapped drive for data uploads on IS300 - "L:" drive

The directory structure on IS300 L: drive is set up as following:

**L:/CARMA\_Analytics/<Project Name>/<Test Facility>/<Vehicle Name>/<add a folder named with current date>/ --- add data files here ---**

**<Project Name>** has the following options currently:

- CARMA\_Field\_Testing
- CAV\_Data\_Modeling
- Core\_Validation\_Testing

**<Test Facility>** has the following options:

- Facility\_ACM
- Facility\_ATC
- Facility\_FDOT
- Facility\_FLETC
- Facility\_Summit\_Point
- Facility\_TFHRC

**<Vehicle Name>** has the following options:

- Vehicle\_Black\_Pacifica
- Vehicle\_Blue\_Lexus
- Vehicle\_Silver\_Lexus
- Vehicle\_White\_Ford
- Vehicle\_White\_Pacifica

**<add a folder named with current date>:**

- After navigating to the appropriate directory location based on Project name, test facility where the data was collected and vehicle used for data collection, add a new folder and rename it to current date. For example, if today's date is 18-Mar-2021, rename the folder as 20210318 (YYYYMMDD).

Once the date folder is created, dump all data inside that folder.

Reach out to Tyagi, Ankur ([ankur.tyagi@leidos.com](mailto:ankur.tyagi@leidos.com)) in case of any questions on the directory structure.
